UNDERWEAR

Fit, construction and brand presentation

Underwear ranges bring the garment, waistband, labels and retail format into one product development process.

Garment production workshop, Jinjiang, China

Range

Men's Briefs, Boxer Briefs, Boxer Shorts, Women's Briefs, Thong Underwear, Bonded Underwear, Bras & Bralettes.

Development with DALI

Fabric, garment and elastic teams review handfeel, coverage, seams and waistband behavior together. Accepted fit and sample comments establish the reference for bulk manufacturing.

See underwear manufacturing

SOCKS

Everyday, patterned and sport-oriented ranges

Yarn, knitted design, fit and retail pair packs are developed around the intended assortment.

Sock knitting workshop, Jiangsu, China

Range

Ankle Socks, Crew Socks, No-Show Socks, Stockings & Long Socks, Running Socks.

Sock inspection workshop, Jiangsu

DALI connects yarn and knitted design with sample evaluation, finishing and retail packs. Accepted size, toe, heel and cuff references guide the proposed bulk assortment.

See sock manufacturing

BABYWEAR

Bodysuits, rompers and coveralls

Fabric feel, openings, seams, fasteners and labeling are reviewed for the intended wearer and destination.

Fabric spreading and cutting preparation, Cambodia

Range

Baby Bodysuits, Baby Rompers & Creepers, Baby Coveralls.

Development with DALI

The team connects fabric, garment dimensions, openings, fasteners and labels in the sample review. Accepted references guide production; required product tests follow the buyer and destination requirements.

See babywear manufacturing

SLEEPWEAR & SWIMWEAR

Collections for rest, leisure and swimming

Product, wearer and intended use guide fabric, fit, construction and retail presentation.

Fabric and elastic material references for garment development

Sleepwear

Pajama Sets, Nightgowns, Robes.
Coordinate fabric weight, top and bottom combinations, length, prints, trims and the selling unit.

Swimwear

Bikinis, One-Piece Swimwear, Beach Shorts.
Review shell fabric, lining, elastics, hardware, coverage and fit as a complete combination.

Swimwear manufacturing

FABRICS

Materials developed around the end product

Discuss fabric supply independently, or connect fabric development with a finished-garment program.

Fabric range reference

Range

Knitted Fabric, Cotton Stretch Fabric, Modal Fabric, Bamboo-Derived Fabric, Microfiber Fabric, Nylon Stretch Fabric, Polyester Fabric, Stretch Blend Fabric.

DALI fabric production, Fujian, China

Composition, construction, weight, usable width, shade and finishing define the material to be developed. Required textile claims are matched to the actual material and supporting records.

See fabric manufacturing

ELASTICS & TRIMS

Components that connect material, fit and branding

Elastics and trims can be supplied separately or developed alongside an apparel program.

Elastic and tape product references

Elastic production workshop, Jinjiang

Range

Elastic Waistbands, Branded Elastic Waistbands, Bra Shoulder Straps, Plain Ribbons & Tapes, Lace Trims.

Development focus

Width, textile construction, color, edge finish, stretch and recovery; logo repeat and appearance; garment placement and attachment; roll or cut-length supply.

The trim is evaluated in the intended garment position, with artwork and material approvals connected to the proposed component.

DEVELOPMENT & MANUFACTURING

From product reference to an agreed specification

Start with the information available. Sampling and technical review resolve the product decisions needed for the proposed bulk order.

Garment production, Jinjiang, China

1. Review feasibility

DALI reviews the product idea, intended wearer and bulk requirement to identify material and construction questions.

2. Develop the sample

Technical teams connect materials, fit, trims and retail presentation with the sample objective and revision comments.

3. Carry approval forward

Accepted samples and specifications guide bulk production, inspection and packing at the proposed operation.

Technical worksheets and buying guides: dalicn.com/resources/

Sampling supports bulk brand and retail programs. Minimum quantities, costs and timing are agreed for the actual product and order.

INITIAL CONTACT

Tell us about your product.

Share the product category, available references and estimated bulk quantity. The DALI team will review the proposed development and manufacturing requirements.
